## A COLLECTION OF GREEK RITUAL NORMS PROJECT (SASKIA PEELS)

This talk presents the project A Collection of Greek Ritual Norms, abbreviated CGRN (University of Liège). The CGRN is an online collection and database of over 200 Greek inscriptions with a religious subject matter, notably normative texts concerning sacrifice and purification. Using the EpiDoc XML standard, we have lemmatized the inscriptions and encoded geographic, chronological and thematic information, so that this corpus will be searchable in many different ways. Thus, our website serves not only scholars wanting to study individual inscriptions, but we hope that our tool may further our understanding of what are usually called 'sacred laws' more generally.
