## ON-DEMAND VIRTUAL RESEARCH ENVIRONMENTS: A CASE STUDY FROM THE HUMANITIES (MIKE PRIDDY)

Virtual Research Environments are often highly specialised concentrating efforts around a single collection. The gMan project aims to demonstrate cross-collection discovery, annotation, reporting and management in an on-demand VRE (using gCube) with three heterogeneous classical collections: The Heidelberger Gesamtverzeichnis (HGV), Projet Volterra and The Inscriptions of Aphrodisias (IAph).
