TEXTUAL RE-USE OF ANCIENT GREEK TEXTS: A CASE STUDY ON PLATO'S WORKS (MARCO BÜCHLER & ANNETTE LOOS)

We will discuss the technical realisation and efficiency of several dimensions of detecting citations and apply them in the field of the Plato's aftermath. Central parts of this presentation are graph based approaches. Based on substantial experience of an ongoing collaboration between researchers of Classical Studies and Computer Science we shall also reflect on the different approaches to working with text.
