## LINKING AND QUERYING ANCIENT TEXTS: A MULTI-DATABASE CASE STUDY WITH EPIGRAPHIC CORPORA (TOBIAS BLANKE, MARK HEDGES, SHRIJA RAJBHANDARI)

LaQuAT investigates technologies for providing integrated views across heterogeneous ancient documentary text collections, including relational databases with different schemas and an XML corpus. These structurally diverse datasets overlap geographically, chronologically, and prosopographically, and so a mechanism for querying an integrated set of them is of considerable potential value to the researcher.
