ONOMASTICS AND NAME-EXTRACTION IN GRAECO-EGYPTIAN PAPYRI (BART VAN BEEK)

Several research projects at the University of Leuven currently draw on the interdisciplinary platform Trismegistos (<http://www.trismegistos.org>), which collects metadata about Greek, Latin, Egyptian and other ancient texts. For Greek papyri, we use the XML-encoded full-text corpus of the Duke Database of Documentary Papyri as a basis for data input and analysis.
